

Agriculture: Strawberry Pest Management Guidelines

Harvest

This year-round IPM program covers the major pests of strawberry fruit-production fields in California. Pest management activities for strawberry nurseries are discussed only as they impact pest problems in the field.

About Harvest

- [Mitigate pesticide effects\(/agriculture/strawberry/Pesticide-application-checklist/\)](/agriculture/strawberry/Pesticide-application-checklist/) on air and water quality.

Monitor weekly for [lygus bug\(/agriculture/strawberry/Lygus-Bug/\)](/agriculture/strawberry/Lygus-Bug/).

- If using [degree-days\(/agriculture/strawberry/Lygus-Bug/#DEGDAY\)](/agriculture/strawberry/Lygus-Bug/#DEGDAY), continue the calculations.
- [Keep records\(/PMG/C734/strawberry-lygusurvey.pdf\)](/PMG/C734/strawberry-lygusurvey.pdf) (PDF).

Monitor for [spider mites and caterpillars\(/PMG/C734/m734pinvert.html\)](/PMG/C734/m734pinvert.html).

- [Keep records\(/PMG/C734/strawberry-mitesurvey.pdf\)](/PMG/C734/strawberry-mitesurvey.pdf), and manage as needed according to the Pest Management Guidelines.

Monitor for other [insects and mites\(/PMG/C734/m734epinvert.html\)](/PMG/C734/m734epinvert.html) and flag locations with problems:

- Aphids
- Cyclamen mite
- Thrips
- Vinegar flies
- Spotted-wing drosophila
- Whiteflies

Look for [diseases\(/PMG/C734/m734fpdisease.html\)](/PMG/C734/m734fpdisease.html) and flag locations with problems:

- Angular leaf spot
- Anthracnose
- Common leaf spot
- Fusarium wilt
- Leaf blotch
- Macrophomina crown rot
- Phytophthora crown rot
- Red stele root rot
- Verticillium wilt

Manage [diseases\(/PMG/C734/m734hpdisease.html\)](/PMG/C734/m734hpdisease.html) as needed according to the Pest Management Guidelines.

- Botrytis fruit rot
- Powdery mildew

Look for [vertebrate pests\(/PMG/C734/m734lpvertsigns.html\)](#), flag locations with problems:

- Deer
- Ground squirrels
- Moles
- Pocket gophers
- Voles

[Survey for weed emergence\(/PMG/C734/m734ocweedsurvey.html\)](#); manage as needed according to the Pest Management Guidelines.

Remove and discard decayed fruit and fruit with water damage.

Look for [bird damage\(/PMG/C734/m734hpbirds.html\)](#) on fruit, especially in locations with a history of bird presence.

Consider monitoring salinity of irrigation water.

Monitor soil moisture and irrigate as needed.

Apply fertilizer as needed.
