

Agriculture: Strawberry Pest Management Guidelines

Postharvest

This year-round IPM program covers the major pests of strawberry fruit-production fields in California. Pest management activities for strawberry nurseries are discussed only as they impact pest problems in the field.

About Postharvest

- [Mitigate pesticide effects\(/agriculture/strawberry/Pesticide-application-checklist/\)](/agriculture/strawberry/Pesticide-application-checklist/) on air and water quality.

Consider [rotation crops\(/agriculture/strawberry/Field-Selection/#ROT\)](/agriculture/strawberry/Field-Selection/#ROT) for reducing pest problems and improving soil structure, organic matter, and water penetration.

Consider a cover crop to reduce runoff and erosion.

Thoroughly work-in crop residue immediately after harvest, allowing it to completely decompose before the next strawberry crop.

Analyze field records for pest problems:

Insects

- [Aphids\(/agriculture/strawberry/Aphids/\)](/agriculture/strawberry/Aphids/)
- [Beet armyworm\(/agriculture/strawberry/Beet-armyworm/\)](/agriculture/strawberry/Beet-armyworm/)
- [Cabbage looper\(/agriculture/strawberry/Cabbage-looper/\)](/agriculture/strawberry/Cabbage-looper/)
- [Cutworms\(/agriculture/strawberry/Cutworms/\)](/agriculture/strawberry/Cutworms/)
- [Cyclamen mite\(/agriculture/strawberry/Cyclamen-mite/\)](/agriculture/strawberry/Cyclamen-mite/)
- [Spider mites\(/agriculture/strawberry/Spider-mites/\)](/agriculture/strawberry/Spider-mites/)
- [Whiteflies\(/agriculture/strawberry/Whiteflies/\)](/agriculture/strawberry/Whiteflies/)

Diseases

- [Angular leaf spot\(/agriculture/strawberry/Angular-Leaf-Spot/\)](/agriculture/strawberry/Angular-Leaf-Spot/)
- [Anthracnose\(/agriculture/strawberry/Anthracnose/\)](/agriculture/strawberry/Anthracnose/)
- [Botrytis fruit rot\(/agriculture/strawberry/Botrytis-Fruit-Rot/\)](/agriculture/strawberry/Botrytis-Fruit-Rot/)
- [Fusarium wilt\(/agriculture/strawberry/Fusarium-wilt/\)](/agriculture/strawberry/Fusarium-wilt/)
- [Macrophomina crown rot\(/agriculture/strawberry/Macrophomina-Crown-Rot/\)](/agriculture/strawberry/Macrophomina-Crown-Rot/)
- [Phytophthora crown and root rot\(/agriculture/strawberry/Phytophthora-Crown-and-Root-Rot/\)](/agriculture/strawberry/Phytophthora-Crown-and-Root-Rot/)
- [Powdery mildew\(/agriculture/strawberry/Powdery-mildew/\)](/agriculture/strawberry/Powdery-mildew/)
- [Red stele\(/agriculture/strawberry/Red-Stele/\)](/agriculture/strawberry/Red-Stele/)
- [Verticillium wilt\(/agriculture/strawberry/Verticillium-wilt/\)](/agriculture/strawberry/Verticillium-wilt/)

Analyze how management strategies affected yield to plan a management program for the next strawberry crop.
