

Agriculture: Strawberry Pest Management Guidelines

Prebloom

This year-round IPM program covers the major pests of strawberry fruit-production fields in California. Pest management activities for strawberry nurseries are discussed only as they impact pest problems in the field.

About Prebloom

- [Mitigate pesticide effects\(/agriculture/strawberry/Pesticide-application-checklist/\)](/agriculture/strawberry/Pesticide-application-checklist/) on air and water quality.

Confirm [correct planting\(/agriculture/strawberry/Handling-Strawberry-Transplants/#PLANT\)](/agriculture/strawberry/Handling-Strawberry-Transplants/#PLANT), note any need for replanting.

Monitor for [spider mites and caterpillars\(/PMG/C734/m734lpinvert.html\)](/PMG/C734/m734lpinvert.html)

- [Keep records\(/PMG/C734/strawberry-mitesurvey.pdf\)](/PMG/C734/strawberry-mitesurvey.pdf) (PDF), and manage as needed according to the Pest Management Guidelines.

Monitor for other [insects and mites\(/PMG/C734/m734epinvert.html\)](/PMG/C734/m734epinvert.html) and flag locations with problems:

- Aphids
- Cyclamen mite
- Whiteflies

Look for [diseases\(/PMG/C734/m734epdisease.html\)](/PMG/C734/m734epdisease.html) and flag locations with problems:

- Angular leaf spot
- Anthracnose
- Common leaf spot
- Leaf blotch
- Phytophthora crown and root rot
- Powdery mildew
- Red stele root rot

Look for [vertebrate pests\(/PMG/C734/m734lpvertsigns.html\)](/PMG/C734/m734lpvertsigns.html) and flag locations with problems:

- Deer
- Ground squirrels
- Moles
- Pocket gophers
- Voles

[Survey for weed emergence\(/PMG/C734/m734ocweedsurvey.html\)](/PMG/C734/m734ocweedsurvey.html).

- Apply preemergence herbicide as needed according to the Pest Management Guidelines.
- Handweed as needed.

Remove runners in summer plantings as needed.

Consider monitoring salinity of irrigation water.

Monitor soil moisture and irrigate as needed.

Apply fertilizer as needed.
